PROFILE

I am a motivated computer science student with a strong interest in web development and competitive programming, seeking an entry-level position to apply my skills and knowledge. I am eager to contribute to a dynamic team, further develop my skills in a challenging work environment, and work towards achieving the organization's goals.

EDUCATION

Bachelor of Engineering GPA : 9.32

D. Y. Patil College of Engineering Akurdi, Pune

07/2020 – 05/2024 | Pune, Maharashtra

HSC 67.38%

Pravara Junior College

07/2018 – 03/2020 | Sangamner, India

SSC 91.00%

Innovator's English Medium School Chandanapuri, Sangamner

07/2017 – 07/2018 | Sangamner, India

SKILLS

Programming Languages:

C++, Python, JavaScript

Web Technologies and Framework

HTML, CSS, JavaScript, React JS, Redux, SQL, Firebase

Version Control and deployment

Github, Netlify

Competitive Programming

2 ★ on Codechef (highest rating 1499), 300+ questions on Leetcode

Course Work

Object Oriented Programming ,Data Structures and Algorithm, Database management system

PROFESSIONAL EXPERIENCE

ACM Student Chapter DYPCOE

Technical lead

09/2022 – present | Pune, India

CPMC

Technical team member

06/2022 – present

DRAIC

Technical team member

09/2021 – 03/2022 | Pune, India

CERTIFICATES

Udemy

Python Programming Basics to Advance

Udemy

The Complete Introduction to C++ Programming

University of Michigan (Coursera)

Introduction to HTML5

Udemy

The Ultimate MySQL Bootcamp: Go from SQL Beginner to Expert

University of Michigan (Coursera)

Interactivity with JavaScript

Udemy

React - The Complete Guide (incl Hooks, React Router, Redux)

PROJECTS

Task List

Task List is a React application that enables users to add, edit, and remove tasks from their to-do list. To store and retrieve data, I utilized Firebase storage, which allows for efficient and reliable data storage.

Expense Tracker

The expense tracker frontend React is a user-friendly application designed to help users keep track of their expenses in an organized and efficient manner. The website features a visually appealing interface that allows users to generate monthly and yearly expense graphs to track their spending over time.

Meal Ordering Site

React, Firebase, API

Meal ordering is a web application that allows users to browse a selection of meals and place orders online. The cart management feature would allow users to view their cart at any time and make changes to their orders.

Online Chatting App

Chat App is real-time online chatting web app using React and Firebase, enabling seamless communication and interaction between users. Implemented features such as instant messaging, user authentication, and real-time updates. Leveraged React's component-based architecture and Firebase's real-time database to ensure a responsive and dynamic user experience. Demonstrated strong problem-solving skills and attention to detail in creating a reliable and user-friendly chatting platform.

Coding Universe

Coding Universe is a web application developed using React, Redux, and Firebase. It allows users to write and read programming and technology articles. Users have personalized profiles, can like or dislike articles, and can easily manage their own content. Coding Universe fosters knowledge sharing and community engagement among programmers.
